

COP23 Side Event

Integrated observations for mitigation and adaptation & Practical support to Parties

WEDNESDAY

8 NOVEMBER 2017

13:15-14:45

THEME

Building partnerships for promoting integrated observations is key for implementing a global observing system for climate and GHG. Practical support to Parties is provided through cooperation mechanisms, which support continued operation of key climate stations and satellites. Focus will be on Pacific Island nations.

TOPICS

- Integrated observations for mitigation and adaptation;
- Supporting National Greenhouse Gas Inventories with Earth observations;
- Practical support for Parties to improve observations.
