

A hand is shown holding a glowing blue wireframe globe, which is superimposed over a laptop screen. The background is a blurred image of a person's arm and hand reaching towards the laptop. The text 'OPEN DATA & OPEN KNOWLEDGE' is written in large, white, bold, sans-serif capital letters across the middle of the image. Below it, the word 'Workshop' is written in a smaller, white, sans-serif font, underlined with a thick white line.

# OPEN DATA & OPEN KNOWLEDGE

## Workshop

# Academy Structure

# Data Management

## Data Management

Try yourself: [geo3platform.eu](https://geo3platform.eu) APIs are open!

Acquire, process, distribute, use, maintain, and preserve spatial data. This course includes modules that help you to improve the skills relating to SDI and develop your work. The modules include information, examples, standards and code practices. Material is targeted to developers working for National Mapping & Cadastral Agencies (NMCAs), statistic institutions and other agencies working with spatial and statistical data.

Including modules:

- Open Data and Licences
- Metadata, Semantic Enrichment and EDP
- Semantic Interoperability
- Data Quality Assurance
- Quality Dashboards

# Service Management

## Service Management

This course provides a comprehensive overview of the OGC API Standards and how they can be used to facilitate the interoperability of geospatial services.

The course includes multiple real-life use cases in addition to general overviews and technical descriptions. The learning materials are cumulative, so we recommend exploring them in the given order. But if you feel confident, feel free to dive into one module or study them all!

Including modules:

- Introduction to Standards
- Common aspects of the OGC API Standards
- Data Access Standards
- Other OGC API Standards

# Data and Service Integration

## Data and Service Integration

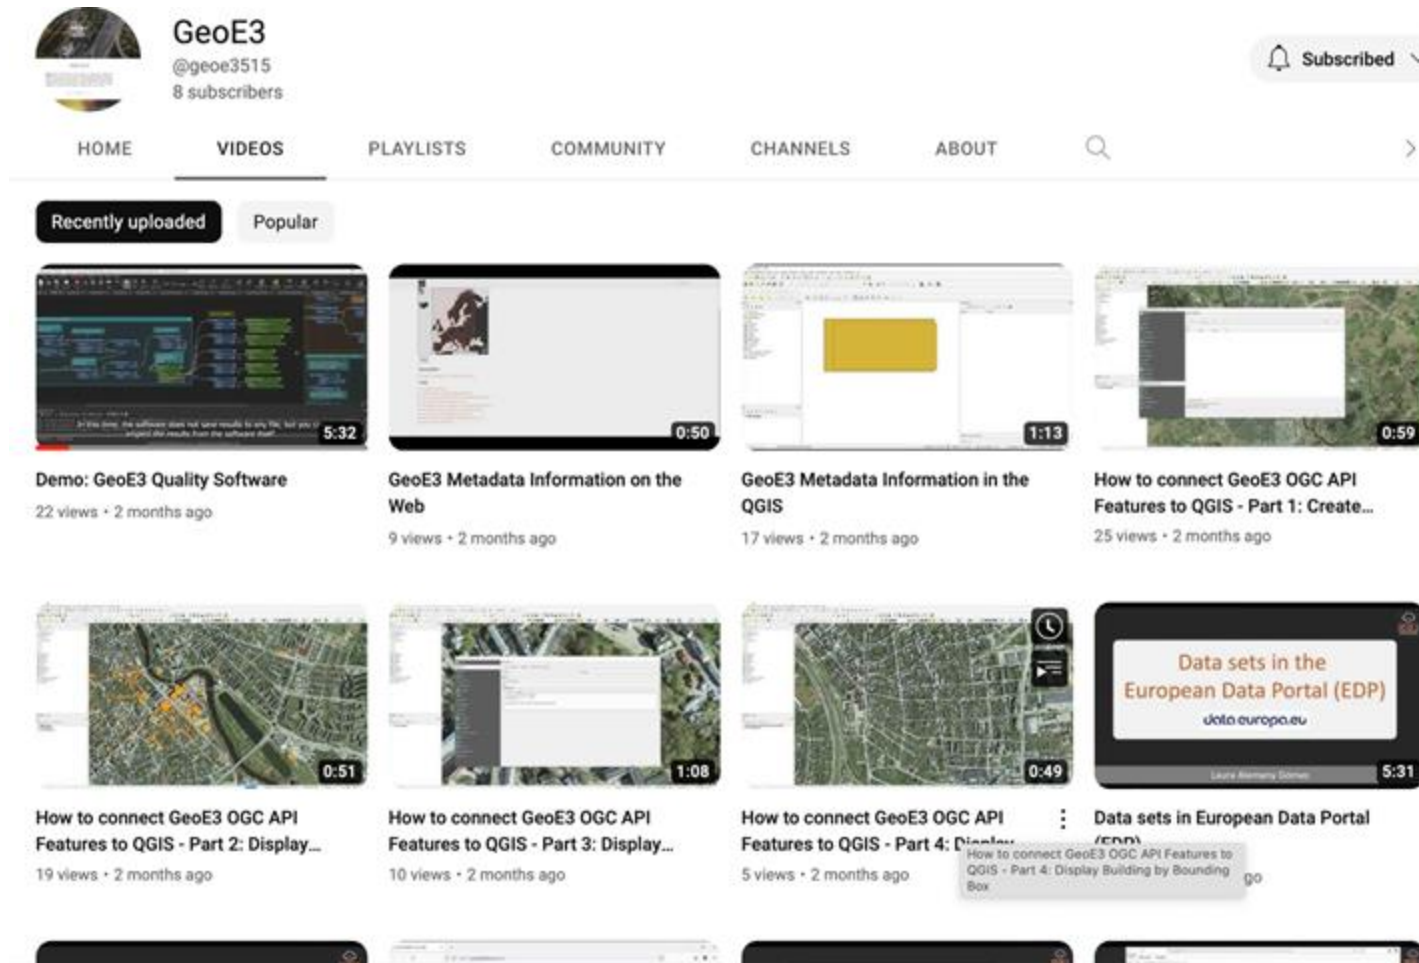

The modules of this course are focusing on the integration of data and services. Material is targeted to developers working for National Mapping & Cadastral Agencies (NMCAs), statistic institutions and other agencies working with spatial and statistical data.

Including modules:

- Joining spatial and statistical data
- Meteorological data integration
- Applications for OGC APIs

# Youtube Channel

<https://www.youtube.com/@geoe3515>

The screenshot shows the YouTube channel page for GeoE3 (@geoe3515). The channel has 8 subscribers. The navigation menu includes HOME, VIDEOS, PLAYLISTS, COMMUNITY, CHANNELS, and ABOUT. The video grid is sorted by 'Recently uploaded' and contains the following videos:

- Demo: GeoE3 Quality Software** (5:32, 22 views, 2 months ago)
- GeoE3 Metadata Information on the Web** (0:50, 9 views, 2 months ago)
- GeoE3 Metadata Information in the QGIS** (1:13, 17 views, 2 months ago)
- How to connect GeoE3 OGC API Features to QGIS - Part 1: Create...** (0:59, 25 views, 2 months ago)
- How to connect GeoE3 OGC API Features to QGIS - Part 2: Display...** (0:51, 19 views, 2 months ago)
- How to connect GeoE3 OGC API Features to QGIS - Part 3: Display...** (1:08, 10 views, 2 months ago)
- How to connect GeoE3 OGC API Features to QGIS - Part 4: Display...** (0:49, 5 views, 2 months ago)
- Data sets in the European Data Portal (EDP)** (5:31, 0 views, 2 months ago)

# New Content

The screenshot shows the 'Location Innovation Academy' website. The top navigation bar includes 'Home', 'My courses', and 'Site administration'. A sidebar on the left contains a search icon and a list of course categories: 'General', 'Winter School on OGC St...', 'Presentation slides', 'AglD Sensor Things', and 'AglD\_SensorThings\_IT'. The main content area is titled 'Presentations' and has sub-tabs for 'Course', 'Settings', 'Participants', and 'Grades'. The 'General' tab is selected, showing a description: 'This is a collection of presentations and videos'. Below the description is a button with a plus sign and the text 'Add an activity or resource', and another button labeled 'Add topic'.

GEOE3 Academy - Module content format

Name of the module:	
Writers of the module:	

**THIS TEXT GOES TO THE WEBSITE:**

Module presentation: key message (3 sec)

Module presentation: summary of the content (30 sec)

Module presentation: data, statistic, prove – write a bullet list. Motivate the learner. (5 min)

## OGC Glossary

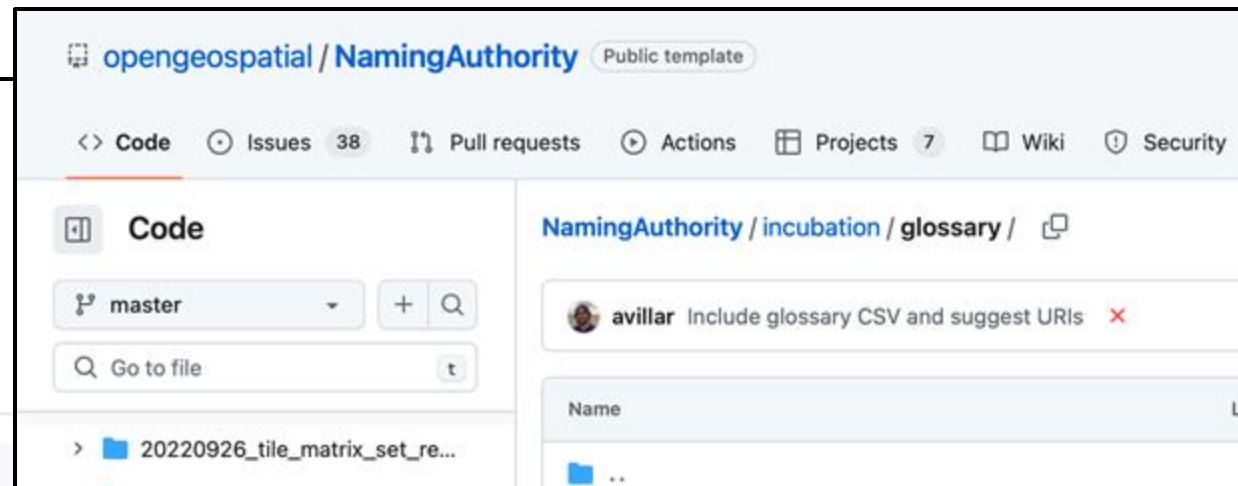

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 🔍

### Abstract Data Type

The basic information construct used by the GeoMobility Server and associated Core Services. Consists of well-known data types and structures for location information. Defined as application schemas that are encoded in XML for Location Services (XLS).

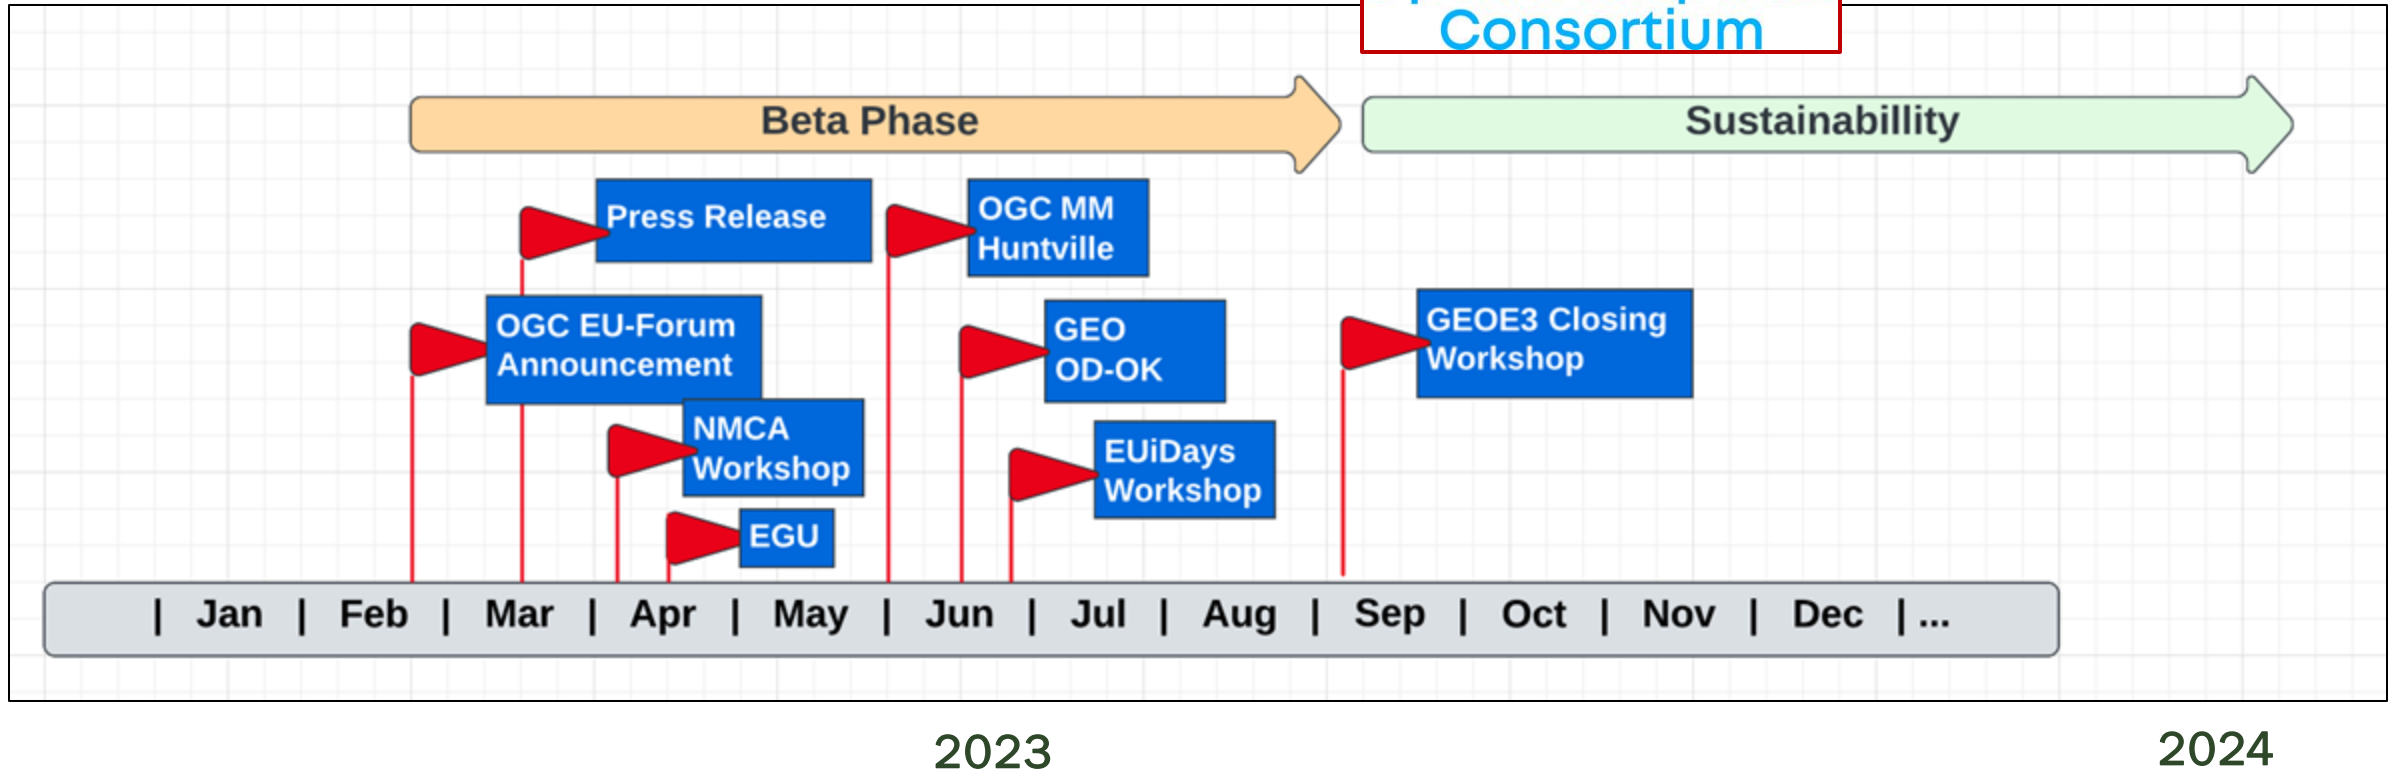

### accuracy

The degree to which information on a map or in a digital database matches true or accepted values. Accuracy pertains to the quality of data and the number of errors contained in a dataset or map. In discussing a GIS database, it is possible to consider horizontal and vertical accuracy with respect to geographic position, as well as attribute, conceptual, and logical accuracy. The effect of inaccuracy and error on a GIS solution is the subject of sensitivity analysis. Accuracy, or error, is distinguished from precision, which concerns the level of measurement or detail of data in a database.

## Statistics 6.6.2023

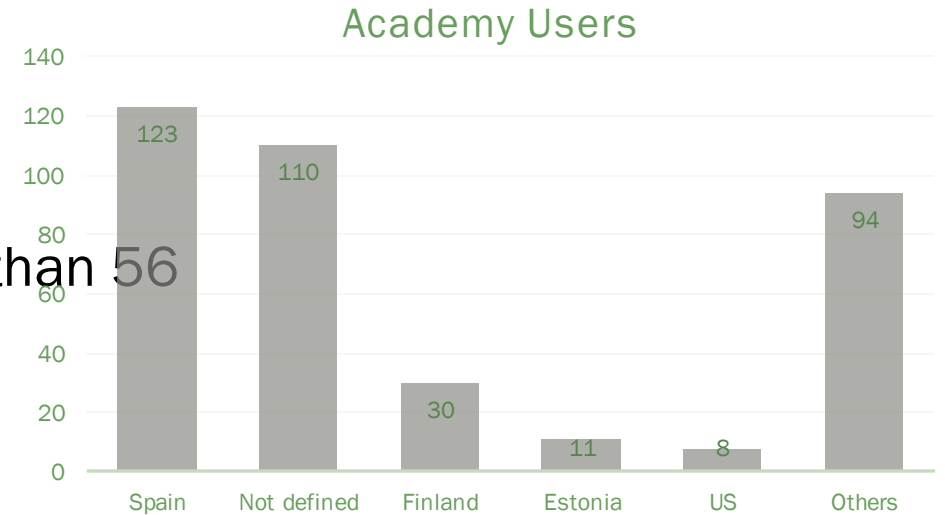

- 376 users from more than 56 countries

- Data Management  
*158 users, 22 completed*

- Service Management  
*99 users, 13 completed*

- Data and Service Integration  
*88 users, 13 completed*

First courses, modules and sections were the most popular ones

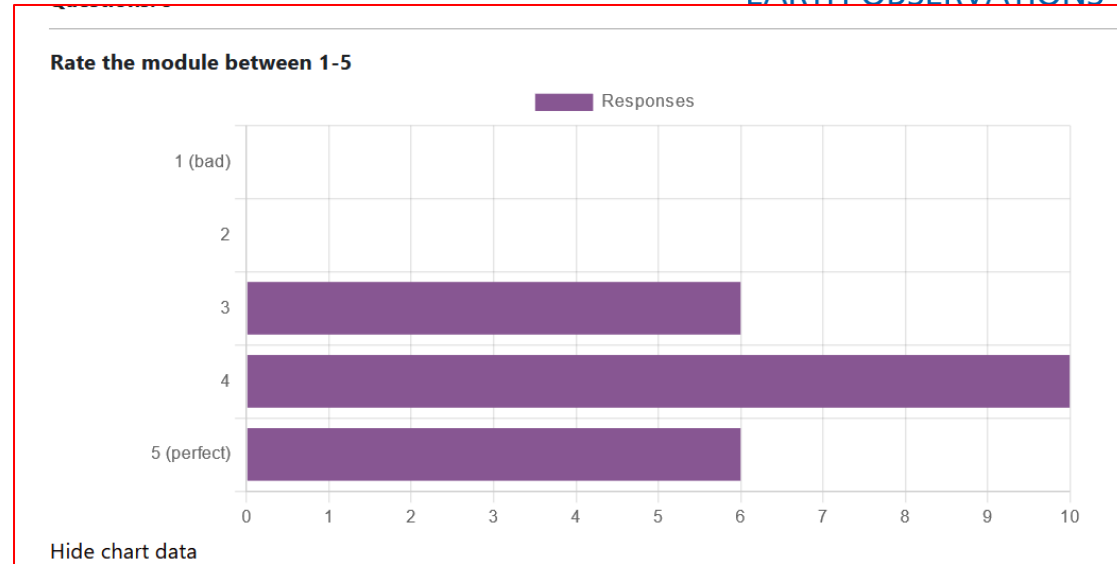

# Let's take a Closer look at the modules

	Module name	The most common section and its views	Feedback Answers
Data Management	Introduction	1. Introduction to Data Management      313 views by 118 users	5
	Open Data and Licences	1. Introduction to spatial data      278 views by 102 users	42
	Semantic Interoperability	2. Introduction to Interoperability      58 views by 22 users	12
	Data Quality Assurance	1. Data Quality      73 views by 39 users	21
	Quality Dashboards	1. Dashboards help understand data platforms      39 views by 15 users	7
	Metadata, Semantic Enrichment and EDP	1. Metadata Profiles and Associated Metadata Standards      203 views by 57 users	28
	Introduction to Standards	1. Interoperability and Standards      188 views by 52 users	26
Service Management	Common aspects of the OGC API Standards	1. OGC API Standards as Building Blocks for Geospatial Data      160 views by 41 users	18
	Data Access Standards	1. Introduction to OGC API Features      126 views by 31 users	16
	Other OGC API Standards	1. Introduction to OGC API Joins      98 views by 31 users	14
	Joining spatial and statistical data	1. Datasets in Data Joining      113 views by 44 users	16
Data and Service Integration	Meteorological data integration	2. Case Finland      73 views by 25 users	11
	Applications for OGC API's	1. The use and importance of service metadata in OGC API      127 views by 29 users	11

# Conclusion of the given feedback

- Modules rating between 1-5, where 1 is bad and 5 is perfect:
  - Not many 1/5 or 2/5 votes*
  - Average for the most modules is 4*
- More than half of the feedback is written in Spanish
- Interactive tools and examples, such as tests, were asked multiple times
- A lot of very useful and professional feedback related to the contents
- Not many technical problems 😊

Feedback of the "Open data and Licenses" module, as an example

## Do we have something to improve?

- I liked it as it gave a good overview of what open data is and why it is important for public organisations. I would have liked some examples or clarifications for the aspect of "organisational interoperability" in the section "Interoperability".
- Sería interesante en el apartado cuarto ampliar un poco más el contenido.
- no, really not
- Test of knowledge on what i learned
- 3. Interoperability - Semantic.. at Figure 2 'developing vocabularies' agree, but code lists with values are not vocabularies! Figure 3: The GML dataset is strange, not related to shape and a lot of xsi:nil = "true" Why?

## Other comments?

- I liked
- This module is very interesting because it has synthetically explained the importance of licenses and open data of all kinds.

# To be discussed

Can you suggest a good approach?

- **Quality ensure**
  - *Detect outdated content*
- **Contributors**
  - *How to become a trainer?*
  - *Who is allowed to provide content?*
- **Content**
  - *Size of the modules*
  - *Selection of topics*

# Thank You

---

## Community

- 500+ International Members
- 110+ Member Meetings
- 60+ Alliance and Liaison partners
- 50+ Standards Working Groups
- 45+ Domain Working Groups
- 25+ Years of Not for Profit Work
- 10+ Regional and Country Forums

## Innovation

- 120+ Innovation Initiatives
- 380+ Technical reports
- Quarterly Tech Trends monitoring

## Standards

- 65+ Adopted Standards
- 300+ products with 1000+ certified implementations
- 1,700,000+ Operational Data Sets
- Using OGC Standards
